Landsbanki orders The Online Trader from Infront

Infront has signed an agreement with the Icelandic Bank Landsbanki to deliver the advanced real-time market information and DMA solution, The Online Trader, for its internal employees across multiple locations.

The Online Trader is one the most advanced and sophisticated information- and trading system available through the Internet targeted towards professionals, private investors and day traders. The solution provides all the information an investor needs to follow the financial markets in real-time and execute orders electronically. The agreement was announced after Infront added extra functionality specific to the Icelandic region, giving Landsbanki users a solution tailored to meet their diverse requirements.

“We are pleased to be able to deliver a system that meets Landsbanki’s needs on both a regional and global level. We recognize the importance of the Icelandic market in the Nordics and Landsbanki is a premier financial actor there. It was an easy decision to add their requirements”, says Kristian Nesbak, CEO for Infront.

”The Online Trader gives Landsbanki a very powerful and easy to use tool to monitor the markets while meeting all the requirements we have in that regard. In addition, the cooperation with Infront has been very good and they responded very well to our requests”, says Gudmundur Gudmundsson, CIO of Landsbanki.

About Infront

Infront provides market data and trading solutions for global financial players on both the buy and sell sides. Infront’s flagship product, The Online Trader, has experienced enormous growth in the last few years and is now a dominant player in the Nordic market.

With a network infrastructure enhanced for larger volumes, expanded market data coverage and a committed reseller network, The Online Trader user base is growing rapidly in Europe.

Infront develops cutting edge technology for both trading systems and the distribution of real-time market data. Leading sell side and buy side players use The Online Trader for cost efficient electronic trading on European and North American exchanges. Infront’s customers rapidly deploy solutions for their clients and for in-

house use because of the solution's integration flexibility, internet based data distribution and straightforward user administration system.

Infront is an independent, privately owned company with offices in Oslo and Stockholm. The company is owned by the employees and Kistefos Venture Capital. For the last few years Infront has been listed on the Deloitte Technology Fast 50 in Norway and Fast 500 EMEA. Infront is AAA rated by Dun & Bradstreet.

About Landsbanki

Landsbanki is a growing European bank with total assets of ISK 3,058 billion (EUR 33.4 bn) at year-end 2007 and a market capitalisation of ISK 332 billion (EUR 2.74 bn) as of 1 April 2008. Through its extensive distribution network of 2,640 employees in 17 countries, Landsbanki is set to deliver targeted financial services based on local expertise for mid-cap corporates in Europe. Landsbanki provides retail and corporate banking, investment banking, capital markets services, asset management and wealth management for private banking clients. Landsbanki's unique product line includes access to both debt and equity markets and its research department is among the most comprehensive in Europe, including some 100 analysts covering close to 950 European stocks.

The market leader in the Icelandic financial service sector, Landsbanki's growth in recent years has been primarily organic, based upon smaller, strategically acquired platforms in the UK, Ireland and Continental Europe. Most recently, the bank acquired the securities broker and investment bank Bridgewell in the UK.

Headquartered in Reykjavik, Iceland, Landsbanki Islands hf. is traded on the OMX Nordic Exchange Iceland under the ticker LAIS. Landsbanki is rated by Moody's (A2 / P-1 / C- / Stable) and Fitch (A / F1 / B/C / Stable).
