## **Infront to deliver technology for NASDAQ OMX Genium trading terminal**

NASDAQ OMX and Infront have agreed to terms by which Infront will deliver the trading terminal for the next generation of the NASDAQ OMX trading technology known as Genium. The new trading terminals are based on Infront's existing trading system, The Online Trader, but with extended functionality and support for the Genium platform.

"We are delighted to be working with NASDAQ OMX to meet its trading technology expectations and those of its customers," said Mr. Kristian Nesbak, CEO of Infront. "Superior transaction efficiency, intuitive user interfaces and highly flexible integration methods are key components to the successful development of our trading systems. We share these objectives with NASDAQ OMX, and have through this agreement created a solid platform for a long-term partnership."

"We are very excited about our partnership with Infront which we are confident will strengthen our trading terminal offering in this rapidly growing marketplace," said Anders Fridlund, Vice President and Head of Products at NASDAQ OMX Market Technology. "Our next generation exchange platform, Genium, will benefit from Infront's experience and proven technology, allowing us to offer trading terminals that meet the needs of functionality, cost-efficiency and integration flexibility."

The NASDAQ OMX Group, Inc. is the world's largest exchange company. It delivers trading, exchange technology and public company services across six continents, and with over 3,900 companies, it is number one in worldwide listings among major markets. NASDAQ OMX technology supports the operations of over 60 exchanges, clearing organizations and central securities depositories in more than 50 countries.

### **About Infront**

Infront provides market data and trading solutions for global financial players on both the buy and sell sides. Infront's flagship product, [The Online Trader](#), has experienced enormous growth in the last few years and is now a dominant player in the Nordic market. With a network infrastructure enhanced for larger volumes, expanded market data coverage and a committed reseller network, The Online Trader user base is growing rapidly in Europe.

Infront develops cutting edge technology for both trading systems and the distribution of real-time market data. Leading sell side and buy side players use The Online Trader for cost efficient electronic trading on European and North American exchanges. Infront's customers rapidly deploy solutions for their clients and for in-house use because of the solution's integration flexibility, internet based data distribution and straightforward user administration system.

Infront is an independent, privately owned company with offices in Oslo and Stockholm. The company is owned by the employees and Kistefos Venture Capital. For the last few years Infront has been listed on the Deloitte Technology Fast 50 in Norway and Fast 500 EMEA. Infront is AAA rated by Dun & Bradstreet.
